Joe Murray, Assistant Professor, Biology
Blue Ridge Comm. College, Weyers Cave, VA

Joe has a Masters of Science in Plant Pathology (Virginia Tech), Masters in Teaching (University of Richmond), and a Bachelor of Arts in Biology (Radford University). Joe is a certified arborist, certified utility arborist and a certified tree worker/climber specialist. Joe belongs to numerous regional, national, and international arboricultural professional societies. Although his “day job” is teaching biology at Blue Ridge Community College, he prefers his other job as a consulting arborist. He serves as a regional coordinator for the Virginia and National Big Tree Registries and is involved in a number of research projects.

James Urban, FASLA and Urban & Associates
Annapolis, MD

James received a Bachelor of Landscape Architecture from New York State College of Environmental Science and Forestry, Syracuse, New York, in 1971. James is particularly well known for his skill in the area of urban arboriculture and soils including the preservation and installation of trees in the urban environment and the development and installation of specialized planting soils for green roof, roof gardens, and urban landscape plantings. Mr. Urban has written and lectured extensively on the subject of urban tree planting and has been responsible for the introduction of many innovations including most of the current standards relating to urban tree plantings. He is currently working on a book on urban trees and soils to be published by the International Society of Arboriculture Press.

Michael Goatley, Jr., Associate Prof, Turfgrass Specialist, Virginia Tech, Blacksburg, VA

Mike received his B.S. (1983) and M.S. (1986) degrees from the University of Kentucky in agronomy-turfgrass management, and his Ph.D in Crop Science from Virginia Tech in 1988. He has been the state turfgrass specialist at Virginia Tech since January 2004 following 15 ½ years as a faculty member in the Golf and Sports Turf Management program at Mississippi State University. He has authored numerous scientific, trade, and extension publications on all aspects of turf management and has co-authored two books on sports turf management entitled: Baseball and Softball Fields: Design, Construction, Renovation, and Maintenance and Sports Fields: A Manual for Design, Construction, and Maintenance.
Objective/goal for the workshop is to provide updates and new information for professionals who design, develop, install, or manage/maintain residential, government, and commercial landscapes.

Landscape professionals are faced on a daily basis with jobs that present challenges. Those challenges can arise whether you are working on a newly designed landscape starting with a blank slate or if you have an established landscape with issues that need to be addressed. Trees and turf perform best when properly planted, established, and maintained according to the plant’s particular needs. The objective for this workshop is to provide updated and new information for professionals who design, develop, install, or manage/maintain residential, government, and commercial landscapes.

Debbie D. Dillion
Urban Horticulturist
